Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Phillipson (US 6,170,144). Regarding claims 1-8, and 10, see Fig. 7 where the claimed structure is shown. The outer wall is angled outwardly about 1 degree. About is a broad term and allows for a great deal of variation.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson (US 1,952,401) in view of Phillipson (US 6,170,144). Regarding claim 1, Wilson as seen in Figs. 1 and 3 teaches the claimed structure but does not each the claimed coverage of the waste basket. Phillipson as seen in Fig. 7, teaches a similar device can be used on a much shorter container. It would have been obvious to employ a shorter container as taught by Phillipson to provide for a smaller volume or a more compact container. The inner wall conforms to the inside of the container as seen in Fig. 3. Regarding claims 7 and 8, the inner wall is angled inward about 4 degrees since

Application/Control Number: 10/643,295

Art Unit: 3727

it is rounded. Regarding claim 10, the outer wall is angled outward about 1 degree.

The about is a broad term and allows for variation.

Response to Arguments

Applicant's arguments with respect to claims 1-8 and 10 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Akins (US 6,446,827), McWilliams, (US 4,372,102) and Hawker (US 4,487,331) are all cited for teaching structures for mounting on the rim of a container.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/643,295

Art Unit: 3727

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph C. Merek whose telephone number is (703) 305-0644. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lee Young can be reached on (703) 308-2572. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
